HOOKING UP YOUR EXPANSION MODULE

1. Unplug and remove the Port 1 Hand Controller from the COLECOVISION™ console, and set it aside.
2. Plug the Expansion Module Connector Cord into the Port 1 jack of the COLECOVISION™ console. See illustration above.
3. Remove Accelerator from the storage well in the Expansion Module. Push down on the bottom of the Accelerator. This will raise the top of the Pedal out far enough from the storage well to grasp and lift out. Now plug the Accelerator Connector Cord into the jack in front of the Expansion Module as shown. Place Accelerator on the floor.

(Continued on next page)

4. Lift out the Port 2 Hand Controller from the COLECOVISION™ console and slide the bottom of Hand Controller into the Accelerator Pedal Well. When Hand Controller is in place, align the Connector Cord with the slot provided and push the top of the Hand Controller down until it snaps into place. **BE SURE** Port 2 Hand Controller is plugged into Port # 2 (front jack).

Now you are ready to begin playing your game! **BE SURE THAT THE COLECOVISION™ UNIT IS OFF BEFORE INSERTING OR REMOVING CARTRIDGE.** Refer to your GAME CARTRIDGE Instruction Guide for game play instructions.

To play your ColecoVision™ without the Expansion Module, remove Hand Controller from Expansion Module, push the locking clip back and grasp the Control Stick and lift out of the storage well. Place the Hand Controller back into Port 2 of your ColecoVision™ Console unit. Unplug the Accelerator Connector Cord from the jack in front of the Expansion Module. Neatly wind the cord and place Accelerator (and cord) back into the Accelerator storage well.

WARNING: ALWAYS UNPLUG THE POWER SUPPLY FROM THE 110/120 VOLT OUTLET WHEN YOU HAVE FINISHED PLAYING.
